Projects

Crime Management System |

A website provides an interface where we can store all crime records. It is a console based project. Objective of project is to implement CRUD operations using JDBC.

Features:

- Login, admin controller, user controller
- Add new crime detail in database.
- Update record | Search record
- CRUD Operation

Tech Stack : Java | SQL | JDBC | DAO

Responsibility : It is a indivisual project in which I make Presentation layer, Admin, login controller, Add crime, Status of crime.

Amusement Park |

A website which provides services to customers who can book ticket in advance to visit amusement park and take as many activities as many times as they wish.

Features:

- Sign-in/Sign-up with admin and customer authentication.
- Exception handling
- Admin, Customer, Activity model.
- Relationship Table
- CRUD operation

Tech Stack : JAVA |MySQL |Spring Boot| Swagger|| Lombok.

Responsibility : It is a group project. My contribution in this project is creation of customer and activity entity and implementation of CRUD operations on these entities.
